McGraw-Hill Publishing Co., Inc., 330 West 42nd St., New York, N. Y.

GENERAL INDEX TO VOLUME 91

JANUARY—DECEMBER, 1947

	Pages
January	1– 75
February	77–149
March	150–223
April	224–294
May	295–368
June	370–440
July	442–515
August	518–589
September	592–665
October	666–737
November	738–812
December	813–888
Mid-December	889–936

A

ACCIDENTS AND ACCIDENT PREVENTION

Blowoff tank explodes..... 630
Explosive hazards in feedwater heaters. H. M. Spring.....*189
Faulty ignition endangers boilers. F. X. Gilg *777
Furnace explosions 533
Have you a powder keg under your plant that is about to explode? W. G. Hudson *774
Incompetence causes accidents..... 779
Labels prevent accidents..... 321
A little gasoline causes serious tank explosion. C. R. Anderson..... 561
Safety ladder made by welding. R. G. Swisher *341
Safety measures for cooling system workers 702
Safety tips on control of solvents.....673
Shipshape safety gear prevents accidents 114
Spade-foot makes ladder nonslip. C. A. Armstrong *561
Ten ways to make tanks safe for workmen. W. E. Rossnagel.....*322
Test detects carbon-tetrachloride vapors. Ray Gentzler 636

AIR COMPRESSORS

Bearing cures air-cylinder trouble. J. P. Carey *484
Cleaning motors with compressed air. Frank Rudolph *192
Compressed-air fires solved in Africa. R. S. Griffith.....140a
Cotton filter cleans the compressed air. J. P. Carey.....*560
Heat and cold from same compressed-air supply *480
How to design and erect a stable compressor foundation. George Steven..*111
Indicator pipes increase clearance. Joseph Bongiorno *86
Meters shows cooling-water flow. Elton Sterrett *861
Open water lines expose flow. J. P. Carey *780
Separator cures their compressed-air troubles. Frank Cowan..... *44
Swiss gas-turbine plant features new centrifugal compressor design.....*851

AIR CONDITIONING

Heat pump saves coal in British power plant 87
Keep cooling systems clean. B. F. Heye*699
Proper water treatment licks scale and corrosion in air-conditioning systems. W. J. Ryan.....*479
Seaman's Bank for Savings uses triethylene glycol for air sterilization. Thomas Barrett *389
Sorbents regulate humidity by soaking up the moisture in air. John Everetts Jr. *748
Tips for air-conditioning engineers. J. D. Constance *608
Alignment of rotating machine shafts....*203
American Boiler Mfrs. Assn. & Associated Industries Convention (picture feature) 549
American Institute of Electrical Engineers Hydroelectric session *174
American Inst. of Mining & Metallurgical Engineers Fuels Div. of American Society of Mechanical Engineers joint meeting *854
American Society of Mechanical Engineers Atlantic City meeting.....*849
Discussion: do outdoor and semi-outdoor plants pay?.....*234
Engineers report new developments at meeting *546
America's Needs and Resources 1950-1960 report by Twentieth Century Fund..*428

ATOMIC POWER

AEC reports on problems of atomic energy program 653
Atomic progress in power, research and isotopes *63
Brookhaven: 6000-acre atom lab.....*227
Engineers report new developments at ASME meeting 546
Great "labs" organize atom research to serve America. Robert Colborn.....*296
Industry's stake in the atom. Robert Colburn *224
New high-energy pile uses plutonium fuel 725
Problems in atomic-power engineering. Prof. A. O. Nier.....*605

AUSTRALIA

Explores her power potential.....*550
Firing with strip-mined brown coal. C. W. Bros. *856
First topping unit: plans 10-year power development *185
Seeks stoker design for brown coal..... 543

B

BEARINGS

Air-cylinder trouble cured by bearing. J. P. Carey.....*484
Alarm bell saves steam-engine bearings. C. R. Kinney.....*413
Babbitting bearings upside down. W. Willecke *265
End thrust adds a mystery to hot bearing. S. O. Smith..... 487
Hints that help in a babbitting job. O. C. Mills..... 709
Belts power transmission belts. F. A. Annett *93-108

BOILERS

ABMA & AI convention (picture feature) 549
Adding compound to boilers. Henigan, O'Leary, Summer, Thomas, Belton, Armstrong, McKnight, Foyle, Atlas, Whitlow, Needham, Lane, Millibon..*639
Air cooling extends furnace-wall life..*631
Amines stop corrosion, experience shows. Moncrief & Dreyfus..... *19
Australia seeks stoker design for brown coal 543
Avoiding slag on superheater tubes. Graef, Belton, Demling, Webber, Parmer, Mullen, Higgins..... *48
Before and after photos of furnace interior helps problem. C. T. Smith...*335
Bell gives tongue to water-level gage. J. P. Carey.....*858
Blowoff tank explodes..... 630
Boiler blowdown, like a hole in your pocket, can waste income. N. T. Pef *166
Boiler-water level controls feed pumps. G. L. Radamaker.....*559
Burning fiber in hrt boiler. Eisenhard, Parmer, Atlas, Wilkes, Hamilton.....*199
Care of steam boilers during normal operation. H. M. Spring..... 46
Chart to determine boiler-water concentration and blowdown (Power's Data Sheets) *61
Chemical feeders made to order. A. R. Eastcott *859
Connects units of different pressures to header. C. L. Poulson.....*131
Correct blowdown setting keeps boiler and steam clean, saves fuel dollars. Dr. W. D. Turner..... *28
Cut your smoke by increasing turbulence *407
Device keeps attendant on the job. R. C. Henderson 637
Electric steam boiler uses hydro power, cuts fuel cost in Kalamazoo Vegetable Parchment mill *518
Electrical deaeration licks corrosion in English plant. V. Rodwell.....*324
Faulty ignition endangers boilers. F. X. Gilg *777
Feedwater heater cleaning restores feed temperature. O. M. Roberts..... 781
Five ways to remove dissolved silica from boiler feedwater. M. E. Gilwood*540
Fouling of boiler water. H. M. Spring..*336
Fundamentals of feedwater treatment. E. W. Feller.....*813-848
Furnace explosions 533
Gage-glass condensate cracks metal by pocketing at drum counterbore. J. A. Keeth *532
Gas-fired boilers protected by sheet-metal hood. A. C. Wiggins.....*781
Handling condensate from heating and process. E. W. Feller.....*239-254
Hidden danger in lap joint. H. M. Spring *331
Horizontal cyclone furnace burns high-ash-low-fusion coals easily. Grunert, Skog & Wilcoxson..... *15
House heating boilers on roof to keep valuable space marketable. H. B. Steggall *302
How long can yesterday's equipment take it in today's power plant? A. A. Potter *257
Incompetence causes accidents..... 779
Lamp spots water level for fireman. R. A. Lane.....*708
Let's kill 'boiler horsepower'..... 77
Meeting emergencies in steam-boiler operation. H. M. Spring..... 120
Mill scale removed from new boilers by solvents. L. B. Wilson.....*458
Misaligned holes cause failure of staybolts. J. J. Timmons.....*484
Oil kept out of boilers. C. R. Kinney..*118
Outdoor plants symposium by ASME..*304
P alkalinity test for boiler blowdown, Ryan, Pef 728a
Patches for boilers. Hamilton, Smith, Wilkes, Belton, Kilbourn.....*562
Photocell improves sander-dust burning in veneer plant.....*409
Plant data book shows the way to improve operation *470
Smoke abatement can pay off.....*703
Springfield, Mo. City Utilities rebuilds boiler setting, reduces maintenance. J. G. Thorpe.....*620
Valves for blowdown. Lane, Fountaine, Smith, Belton, Price, Goldsmith, Mullen, De Rosa, Giordano, Webber, Kilbreath, Smith, Wilkes, Daley, Parks, Minehart *342
Valves for blowdown. Porter, Demhurst, Cantrell, Schellenberg, Di Lorenzo, Cunningham, Coulden, Withers, McKnight, Pef, Brown, Demere, Conk, Harville, Wilkes, Burns, Needham, Connor, Poor, Muellerlelle.....*414
Violent boiling causes false low-water cutout. E. A. Kaupal.....*338
Waterwalls: a must with high boiler-water concentrations. M. H. Kuhner*450
What bows the tubes in low-pressure hrt boiler. Spring, Deming, Conk, Heckman, Giordano, Lane, Squires, Di Lorenzo, Belton, Clements, Carter, Parmer, Connor *122
What to do when boiler tube fails. A. W. Shepherd..... 719
Bradley, Fank L: a power personality...*255
Buyers' Guide, Mid-Dec..... *55

C

CANADA

AIEE's summer meeting reviews Canadian hydro practice.....*553
Hydroelectric projects built or on order in the U. S. and Canada in 1946 (table) 380
Nova Scotia Light & Power adds steam generator, cuts coal use, increases hydroelectric generation *2
Polymer Corp., raw-water softening experience. J. E. Lewis.pt. 1 *150, pt. 2 *230
Saguenay hydro plants.....*850
Chile—Largest diesel built in the U. S...*680

(*) Illustrated. (Ed.) Editorial.

Page

CHIMNEYS

Clean stacks—a job for the power engineer. Rowley & McCabe.....*442
How fuel burns. Rowley & McCabe....*525
Theoretical stack draft (Power's Data Sheets) *723

COAL

Air fork chases coal from drop-bottom cars. C. W. Parks.....*859
Australia seeks stoker design for brown coal 543
Construction of coal conveyor. Parmer, McKnight, Belton, Scott, Lane, Vallery *268
Firing with strip-mined brown coal in Australia. C. W. Bros.....*856
Flap gate on hopper gives proper coal mix. C. L. Carter.....*340
Have you a powder keg under your plant that is about to explode? W. G. Hudson *774
Horizontol cyclone furnace burns high-ash low-fusion coals easily. Grunert, Skog & Wilcoxson.....*15
Know coal and its selection for smoke-free combustion. Rowley & McCabe..*758
Mississippi Power increases capacity of gas-fired plant and plans for pulverized-coal firing if needed.....*764
Scraper equipment stockpiles coal for utility *184
Shovel on wheels meets emergency when coal conveyor breaks down.....*483
Underground coal gasification in Alabama 212
Underground gasification highlights joint fuel meeting, Cincinnati. Fries & Schroeder *854
Why foresight in coal-bunker design pays off in operation. Eugene Hahn.....*320
Cole, Albert L.—farm boy with mechanical leanings *623

COMBUSTION

Cut your smoke by increasing turbulence*407
Darnell takes issue with hydroxylation theory of burning.....856
Horizontal cyclone furnace burns high-ash low-fusion coals easily. Grunert, Skog & Wilcoxson.....*15
How fuel burns. Rowley & McCabe...*525
How to fire oil or gas without smoke. Rowley & McCabe.....*592
Total air for combustion (Power's Data Sheets) 797
Compressors—Pressed fit on crankshaft stops overhung-flywheel wobble. Elton Sterrett *612

CONDENSERS

Float-controlled valve holds condenser's vacuum. S. M. Elonka.....*121
Mussel shell shuts down turbine. M. E. Marshall *118
Plant data book shows the way to improve operation *470

CONTROLS

Boiler-water level controls feed pumps. G. L. Radamaker.....*559
How to select a control valve. B. A. Irwin pt 1 *627, pt 2.....*670
How to select and install pyrometer leadwires. Roberts & Vogelsang.....*447
Photocell improves sander-dust burning in veneer plant.....*409
Solenoid valves control this heating system. William Note.....*780
Tin-can float operates toggle switch. J. A. Coulden.....*267
Cooling towers—Water know-how cures cooling-tower headache. G. C. W. Golem *115

CORROSION

Correct materials make feed pumps immune to corrosion-erosion. H. L. Ross *464
Electrical deaeration licks corrosion in English plant. V. Rodwell.....*324
Gage-glass condensate cracks metal by pocketing at drum counterbore. J. A. Keeth *532
Proper water treatment licks scale and corrosion in air-conditioning systems. W. J. Ryan.....*479
Vacuum deaeration rids cold water of dissolved gas; saves pipelines. S. T. Powell *403
Wilmington, N. C. marine 'lab' aids corrosion research. E. W. Feller.....*544

COSTS AND PERFORMANCE

Gas-turbine possibilities in the stationary power plant field. Rowley & Skrotzki pt 1 *392 pt 2.....*452
Kalamazoo Vegetable Parchment mill cuts fuel cost with byproduct steam.*518
Mercury-turbine possibilities for new plants compared with high-pressure high temperature steam turbine units. Adams & McClure.....*10
Nova Scotia Light & Power increases hydro generation while decreasing coal used, by adding steam capacity..*2
Plant data book shows the way to improve operation *470
Plymouth Cordage saves fuel by burning waste hemp. C. B. Hudson.....*555

Page

Supercharged diesel puts 500 kw in space originally provided for 300, New York City office building.....*461
Value of supercharged diesels shown by performance and cost comparisons. V. M. Holmes.....*752
Couplings—how to check a shaft's coupling joints *276
Cuba—Nicaro Nickel Co., Cuba, refinery treats feed-water for process steam. V. H. Brogdon.....*82

E

Edwards, George—class struggle isn't the answer 210
Do you practice "Buymanship"?.....798
Engineers make leaders.....724
Fact or fiction-.....136
Four requirements for success.....876
Free press and advertising.....62
How to prevent confusion.....428
'Let's be human'.....575a
New proverbs for young engineers..282, 356
No time to rest on your laurels.....652
Terror—The Scream of "Fire" in a Movie 502
Electrical Engineering Exposition.....*182

ELECTRICITY

Arkansas Power & Light raises 120-ton generator to the roof.....*624
Armature and stator slots cleaned with steel brush. W. E. Warner.....47
Brushes off neutral, blacken commutator, rings. B. R. Stewart.....412
Can synchronous generators run out-of-step with the system? A. A. Johnson *39
Capacitor slows up brake action. O. C. Miles *266
Commutator fails due to bearing oil. C. R. Anderson.....780
Electrical-angle measurement on motor and generator determines load limit. K. J. Granbois.....*154
Energy-load and load duration curves save hours of calculation. G. C. Boyer *385
Faulty ignition endangers boilers. F. X. Gilg *777
Gas-compressor motor protection insures against unexpected failure. Gilbert Lindgren *258
How to apply ac motors economically. Carl Bauman *317
How to select and install pyrometer leadwires. Roberts & Vogelsang.....*447
How to undercut a commutator.....*792
Individual motors replace lineshafts to speed production. A. A. Marschat...*41
Insulation resistance guides motor repairs. R. C. Henderson.....861
Large generators prove themselves. C. M. Laffoon.....*597
Load for slipring motor. Pollock, Demling, Toma, Mathews, De Rosa, Roberts, Hoar, Thompson, Smith....*270
Match your motor to the driven machine. Carl Bauman.....*444
Mercury-pool rectifiers supply dc when and where you want it. S. R. Durand*614
Motors cleaned with compressed air. Frank Rudolph *192
Motors produce hot bearings, S. O. Smith 487
Motor windings dried by heated compressed air. W. E. Warner.....708
Motor's unbalance caused by pulley. S. O. Smith.....118
Photocell improves sander-dust burning in veneer plant.....*409
Relay cuts cost of installing siren. E. A. Roberts.....*341
Resistances in parallel (Power's Data Sheets) *929
Reversing motor stator put thrust on bearing. H. C. Bauman.....*635
Solenoid valve troubles. Ardolino, Wilkes, Farmer, Hoffman, Bachman..*638
Solid neutral keeps the voltage balanced in building. Joseph Bongiorno.....*121
Speed control for motors. Bachmann, Hoffman, Warner, Seaton, Smith, Roberts, Bongiorno, Coulden, Markland, Kornahrens 784
Starting motor and generator together. Kelley, Eastcott, Coulden, Moore, Hoffman, Roberts, Klokholm, Webber, Hoar, Bachmann, Butler.....*564
Supercharged diesel puts 500 kw in space originally provided for 300, New York City office building.....*461
Support for motor starter. L. W. Rogers *195
Synchronous motor with direct-connected exciter refused to get excited. J. A. Coulden.....264
Synchronous motors: yesterday and today. A. G. Ferriss.....*772
Test for correct phase relation. J. A. Coulden *193
Testing insulation resistance. Hoffman. Curdts, Scott 491
Three-phase motor operates on single phase. B. A. Briggs.....*120
To oil or not to oil commutators and brushes. R. C. Henderson.....858
Transformers protected by barbed wire. Elton Sterrett *485
Trouble with brushes in rotary converter. Hoffman, Bachmann, Maher, Klopfenstein, Wilkes, Giordano..... 345

Page

What is synchroscope connection reference? McNally, Bachmann, Porter, von Dannenberg, Roberts, Hoffman, Kelley, Hodges, Livingston, Eliff.....*862
Elevators—wood block positions elevator selector. Frank Schlieff.....*411
Engineers—it doesn't pay to be a high-hat. N. L. Rea..... 156
To become a capable engineer know your plant intimately. E. W. Feller.*261

ENGINES—DIESEL AND GAS

Chile gets largest diesel yet built in U. S. *680
Diesel down a hole, New York City office building *474
Diesel lube-oil specs- trap for the unwary? Dr. E. B. Nugent.....*678
Difficulties did not stop this engine. R. C. Henderson..... 782
Must diesel engines smoke? P. H. Schweitzer *178
Rope on salvaged wheel improves engine starting. M. T. Pate.....*266
Saving diesel engine cooling water. Hoffman, Freye, Fontaine, Lane, Mullen, Bartels, Nichols, Miller, Roberts, Parmer, Belton *711
Supercharged diesels: a correction.....*857
Supercharged diesel puts 500 kw in space originally provided for 300, New York City office building.....*461
Supercharging gas-burning diesel yields maximum performance *396
Unorthodox ignition keeps engine going. W. B. Kennedy.....*338
Value of supercharged diesels shown by performance and cost comparisons. V. M. Holmes.....*752
What do you know about buying a diesel? *30

ENGINES—STEAM

Alarm bell saves steam-engine bearings. C. R. Kinney.....*413
Oil-line change corrects lube trouble. C. R. Robinson.....*45
Why does engine pound on low steam pressure? Yavitch, Fontaine, Page, Wilkes, Groh, Hicks, Belton, Porter, Avant *865

EQUIPMENT

Accumulator, hydraulic *354
Air compressors *58, *132, *360b, 499
Air conditioner *795
Air eliminator 218a
Air hose nozzle.....881b
Alarm, process 71b
Amplidyne, electronic *878
Anchor, screw 806a
Analyzer, boiler-water *795
Base, tilting pump.....360b
Battery charger *149b
Battery, storage 574
Bearings, temperature indicator..... 872
Belt cutter 883c
Belting, transmission 883b
Binding post 504
Boiler, electric 58
Boiler fittings 806a
Boiler, packaged *795
Boiler, waste-heat 806b
Boiler, watertube *794
Booster, hydraulic *207
Boring tools 433b
Brazing flux 806a
Brush conditioner 510c
Burette, automatic 649
Buyers' Guide .....Mid-Dec *55
Caliper, vernier 216c
Calculator, Ohm's-law 207
Capacitors, motor starting.....*433c
Capacitors, pyranol *730c
Capacitor units *71a
Capacitors, with cast-glass bushings...732c
Cement, refractory 352, 362b
Chart, blowdown 71a
Circuit breaker 352, *354, *425
Clamps, attachment 872
Clamps, for pipe leaks.....*70a, *208, 509a
Clamps, pipe *872
Clamp support 648
Cleaner and blower.....218a
Cleaner, hand 148c 882b
Cleaner, intake *805b
Cleaner, portable 800
Cleaner—soot remover 148c
Cleaner, vapor 362e
Cleaners, welding tip..... 504
Clevis hook 795
Clocks, program *70b
Coating, protective 132, 278
Comparator, metals 822c
Compounds, oil resistant insulation.... 650
Condenser, evaporative *133
Condensing unit *208
Conductor, watercooled 573
Connector, filling *658c
Connector, ground 806b
Connector, one-piece 509c, 582b
Connector, solderless *134, 732b
Connector, tube 208
Connectors, wire 134
Contactors, heavy duty D C.....*70c
Contactors, solenoid *874
Control, ac welding..... 499
Control, combustion 574
Control, device, magnetic.....*353
Control, electronic 500
Control, level 572
Control, peak-load 574
Control, positioning 650

(*) Illustrated. (Ed.) Editorial.

Control, pressure 731c
Control, servo *794
Control, smoke *59
Control, temperature 510c, 806a
Control, thermostat 796
Control unit, quick-change 511b
Control unit, rubber spring mounting ..*732a
Control, water-level 510b
Controller, automatic 362b
Controller, combustion 208
Controller, electronic 278
Controller, heating *720
Controller, level 69c
Controller, servo system 806b
Controller, time-cycle *659a
Controller, water-level *649
Conveyor belt 511a, 573, 581c, 883b
Conveyor belt idler *882c
Conveyor, belt take-up *659c
Conveyor, flight *659b
Conveyor, lightweight 361c
Conveyor scale 882b
Conveyor, transfer *801
Cooler—efficient aftercooler *425
Cooling tower 578, *649, *726
Coupling, flexible *361b
Coupling, pipe 508c
Coupling, universal-joint 504
Crane arm 881b
Crane control *149a
Crane, folding portable *149b
Cutlet box 648
Cutter, tube 800
DC. regulator 360c
Deaerator, vacuum 578
Degreaser 362a
Demineralizer, water 500
Distribution fuse *795
Door, furnace, transparent 500
Drafting tool 882a
Drill, concrete 882c
Drill, electric *878
Drills, masonry 578
Drives, electrofluid *59
Drives, gearshift *132
Drive, motor, variable-speed 511c
Drives, rheostat *208
Dust collector 583a
Electrical contracts *657c
Electrical cords, portable 731c
Electrode, arc-welding 511b
Electrodes, hard facing 133
Electrode holder 582c
Electrode, stainless steel 278, 509c
Electrode, welding ..132, 279, *288b, 352, 424, 508c, 581c
Elevator, lightweight 362a
Enamel, fume-resistant 500
Engines, diesel 498, 572, 878
Engine, diesel, and tractor 883c
Engine, multi-fuel 874
Entraining agent 806b
Exhausters, industrial 288a
Fan, axial-flow 882a
Feeder bus *659c
Feeder, chemical 216c
Filter, cartridge *71b
Filter, lube-oil purifier *58
Filter, oil 354
Filter, oil, continuous 279
Filter, oil, high flow *280
Filter, oil replacement 498

HEATING AND VENTILATING

Explosive hazards in feedwater heaters. H. M. Spring *189
Generating power and heat with exhaust steam. Hoar, Demere, Giordano ... 710
Handling condensate from heating and process. E. W. Feller *239-254
Heat pump saves coal in British power plant 87
Hotwell takes kinks out of feed heater. A. N. Musgrave *637
House heating boilers on roof to keep valuable space marketable. H. B. Steggall *302
Solenoid valves control this heating system. William Note *780
Steam district heating companies face growing loads and rising costs *632
Herzog, John: a power personality *473

HIGH PRESSURES AND TEMPERATURES

Can steam-turbine stations profit by using high temperatures? Dr. Adolphe Meyer *745
High-temperature metals. Rowley & Skrotzki *681-696
Incompetence causes accidents 779
Rochester Gas & Electric aids system by mile-long high pressure steam line. J. J. Schenck *674
Horsepower—Twenty men equal one horse says C. M. Ripley *186
Hudson, C. Brooks: a power personality .. *181

I

India—Hydroelectric developments for irrigation and power. J. K. Van Denburg *310

INSPECTION AND MAINTENANCE

Armature and stator slots cleaned with steel brush. W. E. Warner 47
Auto jacks raise heavy cooling coils. F. H. West *413
Bearings babbitted upside down. W. Willecke *265
Before and after photos of furnace interior help problem. C. T. Smith *335
Boring holes in glass. H. P. Cleary 783
Calculation chart: bolt and stud tension. Raymond Septor (Power's Data Sheets) *575
Compressed air cleans motors. Frank Rudolph *192
Compressed air does cleaning job. Frank Rudolph *192
Drill holder locates the shaft centers. H. Moore *781
Feedwater heater cleaning restores feed temperature. O. M. Roberts 781
Flexible shafts and couplings protect high-speed gears. R. L. Benford *477
How to attach carbide tips to tools *129
How to bend tubing or small-size pipe .. *351
How to cut a keyway with a drill press. Frank Cowan *45
How to grind seals on compressor shaft. *421
How to rebuild teeth in gear wheels ... *717
How to recondition a soldering copper .. *496
How to recondition worn shafts and rods *571
How to solder stainless steel fittings *57
How to undercut a commutator *792
Ice serves as lowering tackle. F. L. Berry 340
Joint wrenches for close quarters. S. M. Elonka *267
Know-how makes tough hoisting job easy. H. B. McDermid *46
Lathe faceplate loosened by heat. H. E. Johnson *487
Makes split sprockets for roller-chain drives. G. M. Hardy 485
Metal spray reconditions plug valves for longer life. B. L. Bailie *312
Metal spray restores turbine seal rings. F. Britt *188
Mill scale removed from new boilers by solvents. L. B. Wilson *458
Motors—how to check a shaft's coupling joints *276
Motor windings dried by heated compressed air. W. E. Warner 708
Mussel shell shuts down turbine. M. E. Marshall *118
Portable test bench to service safety valves. W. E. Rossnagel *193
Pressed fit on crankshaft stops overhung-flywheel wobble. Elton Sterrett .. *612
Program for pump and motor repair. Lane, Smith, Price, Kiriakon, Griffel, Mullen, Crater *787
Proper fan installation reduces operating and maintenance costs. J. P. Holtzclaw *171
Purging eliminates explosion hazards in tanks. W. E. Rossnagel *707
Refacing jig for pump valves. C. A. Armstrong *487
Setscrews serve as substitute for keys. Frank Cowan *264
Shop for refrigerator repairs. A. C. Hickey *634
Split-nut persuader grips stud's threads. G. B. Doubleday *46
Stand, adjustable, positions work correctly. L. L. Kelley *194
Suspends fabric hose for quick drying. C. A. Armstrong *709
Tapered dowel speeds bearing assembly. Samuel Marano *709
Testing insulation resistance. Hoffman, Curdts, Scott 491
Tool reseats pump valves in place. Henry Greiner *484
Two indicators check coupling alignment. Richard Nanni *558
Valve-seating job. S. M. Elonka *47
V-blocks for supporting pipe during welding. B. R. Russell *412
Wire guard retains the Woodruff key. H. Moore *47
Wrench gets difficult nuts *861
Wrench, non-scar, for engine piston rods. S. M. Elonka *339
